**Description**

1. install and activate Malibu-Theme (1.2.0)
2. open SE4
3. go to Areas > Header > Variants
4. check out the default (Standard) Variant --> color is \$brand-Primary
5. activate another header-variant, go to its respective settings

result:

- although the color is \$brand-primary in the settings, the header is white
- if you change the color, save, afterwards go back to \$brand-primary, save, it will work
